

Full Overlap Seal End (FOSE)

This carton is generally assembled, filled and sealed on automatic, horizontal or vertical packaging equipment. This style is also beneficial for larger volume orders as it's not packed by hand. Additionally, each style seal end can feature a zipper-style tear strip on the top panel if chosen. Full flap style cannot reclose once the end consumer opens it from the top panel. Partial flap style allows carton to be reclosed by the end consumer. (Ex. cereal boxes)

Size measured: L x W x D
